

JOT Token Whitepaper (Lite Version)

1. Introduction

JOT Token is a fair-launched, community-driven meme token built on the BNB Smart Chain. With 99% of the total supply burned and LP tokens also burned, JOT aims to become a symbol of transparency, grassroots support, and ethical DeFi development.

2. Why JOT is Different

Unlike other meme tokens, JOT did not rely on insider allocations, presales, or venture capital. Instead, it was launched from zero, with a fully open and public approach. Every step has been visible to the community.

Key Differences:

- No presale
- No VC funding
- No secret wallets
- LP tokens burned
- Built from zero, by real people

3. Tokenomics

- Name: Just One Token (JOT)
- Network: BNB Smart Chain (BEP-20)
- Total supply: 1 trillion initially minted
- Burned: 99% supply burned on launch
- Circulating: 1 billion JOT (100% available to the market)
- Liquidity: 1 billion JOT was added to PancakeSwap with WBNB manually by the creator. The LP tokens received from this first liquidity addition are locked for 6 months.
- Any additional liquidity added after that is paired with WBNB and the LP tokens are permanently burned immediately after — to protect the community and prove the honesty behind the project.

Why We Burn LP Tokens

From the beginning, we made it clear: JOT should be owned by the people, not manipulated by hidden wallets. That's why:

- The initial LP tokens are locked for 6 months (proof of commitment).
- Every new liquidity contribution is followed by immediate LP token burn (proof of transparency).

This ensures that no one — not even the creator — can pull liquidity or dump on the community.

Note on Trading Pairs and Price Integrity

At the moment, only the official trading pair JOT-WBNB exists. Other pairs can technically be created by anyone, but they are unofficial and not supported by the core team. The JOT-WBNB pair is the only one with locked or burned LP tokens.

4. Honest Growth Over Hype

We didn't buy followers. We didn't pay influencers. We didn't fake a pump.

We have only a few early believers — and every one of them is real.

Why? Because we want organic, honest growth.

Many meme tokens launched their campaigns quietly, burning LP in silence before public announcements. With JOT, we do the opposite:

- All burns are public.
- All updates are shared immediately.
- All steps are visible on-chain.

If JOT grows, it will be because real people saw something real. Not because someone bought their way to hype.

5. Community & Transparency

JOT is built in public.

- [Telegram EN](#)
- [Telegram RU](#)
- [Twitter](#)
- [Website](#)

Every transaction related to liquidity and burns is shared publicly. There is no private team wallet holding tokens.

6. LP Burn Verification

- [Burn TX](#)

- [Contract](#)

7. Mission & Future Vision

JOT was not just built to create a token. It was created by someone who lost a lot on pump-and-dump scams and wanted to build something real. If JOT succeeds, its creator plans to use part of the proceeds to support children with serious diseases such as leukemia.

The core mission is to show that it's possible to build a strong token with no hype and no manipulation — only community belief and ethical growth.

8. Special Use of Locked LP Tokens

The initial LP tokens — received from the very first liquidity added — are locked for 6 months. But we go further:

- These LP tokens will remain locked as long as JOT has not reached a meaningful market cap.
- After that, they are not meant for personal gain.

The community will decide how to use them — and the vision is clear: If JOT becomes successful, those tokens will become a fund to help children in need, especially those fighting serious illnesses.

"1% of kindness won't hurt the project — but it might save a life.

And maybe, one day, we can say that we didn't just launch a token.

We actually helped someone in this world."

This is our way of proving that DeFi can be honest, and it can also be good.

9. Roadmap (High-Level Preview)

- Phase 1: Token launch, LP added and burned, website live
- Phase 2: Community building (RU + EN), whitepaper publication
- Phase 3: Listings on trackers (CoinGecko, CMC), marketing through community efforts
- Phase 4: CEX outreach, new features, and community-driven utility ideas

10. Final Word

JOT is not just a meme — it's a message. Built by someone with a dream to prove that fairness, openness, and real effort can create something powerful.

As with any meme token, anyone can buy it. Early participants will have more advantage than later ones. But most importantly, we are not building in silence only to create a fake pump.

We believe everyone will get a fair shot.

If you support JOT early, if you believe in the vision, and if you buy during these early stages — that is your chance.

"We won't promise the moon. But we promise that JOT will stay real."

This is only the beginning.

**JOT Token. Just One Token. For real people.
From the creator, with hope.**
